

# Product Overview

Doubler is the quickest, easiest and most cost effective way to add new valves or repair damaged valve wiring. Doubler simply connects new valves to an existing valve while allowing you to control all the valves as if each were hard wired to the controller. Doubler eliminates the need to run new wires saving you the time, expense and hassle of digging and trenching.

## Why you need it?

### Expand

Adding new valves to

- ⚡ Add drip lines
- ⚡ Add sprinkler zones
- ⚡ Water new landscaping

Separating sprinkler zones for

- ⚡ Wet and dry areas
- ⚡ Flower beds and lawn
